“... Just wanted to let you know we are absolutely thrilled with how 785 is turning out for us. She is so docile and beautifully shaped.

We have 2 heifer calves out of her this year and they are some of the best we have ever raised. Her natural calf this year is out of Growth Fund. Her embryo heifer is a Southern Charm. They are both March calves and growing like weeds. **Just thought I would let you know that your genetics are working out great in the desert! Thanks again.**”

Progress Through Testing

DEPPE ANGUS

BULL & FEMALE SALE

Greetings!

We invite you to our annual "Progress through Testing Bull and Female Sale". We have assembled a powerful group of performance-tested bulls and females for your appraisal. Join us at our southern Iowa cooperating partner, Andy Joos, farm near Bloomfield, Iowa, on Friday, February 24, 2023.

Our goal has been the same since the beginning — to produce performance-tested bulls and females that will accelerate and thrive in commercial and seedstock producers' herds.

We began performance testing at the Iowa Cattleman's bull test stations in 1999. In 2013, we began testing bulls at the granddaddy of bull tests — the Midland Bull Test in Columbus, MT.

Over the past years, we have enjoyed much success in producing the high-indexing bull, the World Champion Pen of Three Angus and numerous other awards. We are proud to compete with some of the best herds in the country at this test and offer genetics similarly bred to those in this offering.

In addition, Deppe Angus has raised females that have competed on the national level in the National Junior Angus Phenotype and Genotype Show (PGS). Animals entered in the PGS are evaluated by a judge under a system that requires both genotypes and phenotypes to be considered. The resulting placing is a composite score where the genotype (EPDs & \$Values) and phenotype are equally weighted. This is much like the criteria many bull and female buyers use when selecting their new genetics. We are proud to have raised both a division and reserve-division winner in each of the last two years at the national level. The influence of these females is included in the offering.

Our success and ability to grow are due to terrific partnerships that we have formed with families in the Angus business. Andy and Stacy Joos of Joos Angus and their three sons farm in southern Iowa. Chad and Carrie Gotto farm with their five children in eastern Iowa near Dyersville. Eric and Dianna Smith and son, Dustin, farm in northeast Iowa near Decorah.

DNA data and genomic information have been collected since 2008. We use extensive embryo transfer to grow and make rapid genetic improvements. Cattle must be sound, structurally correct and have eye appeal. We believe in great cow families; females must have strong maternal traits, longevity and a docile temperament.

We will again host our sale using a live auctioneer with TV monitors in lieu of bringing the cattle through the ring. The bulls and females will be penned in an attached barn with plenty of light and space for your evaluations. Thank you to Foundation Feeders for their excellent ability to develop bulls with optimal growth and longevity in mind. All the bulls have been ultra-sounded, breeding soundness examined, and come with a first-breeding season guarantee. Free board and delivery are available on your bull purchases until you need them around turnout time. Please share your intentions with the sale clerks when settling on your purchases.

We greatly appreciate the generous support of our repeat customers over the last 24 years and look forward to earning the business of new customers. Each year, more than 60% of our bulls are sold to repeat buyers. We appreciate your interest in our program. If you have any questions or are interested in viewing the offering prior to sale day, please contact me or Andy.

Best regards, Dennis Deppe

Inspection of cattle

Cattle are available for inspection by contacting either Dennis or Andy up to two weeks prior to sale day.

Announcements

From the block will take precedence over the catalog. Buyers unable to attend may send their bids to Rance Long, Field Representatives or Auctioneer.

Terms and Conditions

Cash. Please settle for cattle promptly. All cattle sell according to the standard terms and conditions of the American Angus Association.

Retained Semen Interest

Sellers retain a 1/3 semen revenue sharing interest on all bulls selling unless stated otherwise. Buyers receive full possession and all salvage value.

Insurance

Insurance will be available sale day. Please notify the sale staff at the time of settlement if you desire to purchase insurance.

Liability

All person attending this sale do so at their own risk, legal or otherwise, for their safety or the behavior of the animals. The Owners, Auction Service, Sale Staff and Host assume no liability for property loss or any accidents that may occur.

DEPPE ANGUS – DATA DRIVEN WITH THEIR CUSTOMERS IN MIND!

It is a pleasure to be working with Dennis Deppe, his family and his partners on their annual "Progress Through Testing" annual Bull and Female Sale. This sale offering is deep in quality with high performance bulls and a super productive set of females selling – All backed by Proven Genetics!

Purebred and commercial cattlemen will appreciate this data driven program as there is complete performance information available on every bull. There will be sons of the breeds most popular and proven AI sires selling, including sons of: DB Iconic, Sitz Resilient, Deer Valley Growth Fund, Tehama Tahoe, Sitz Barricade and Sitz Stellar along with several others. Each of the sire groups have many attributes to offer the beef industry, from calving ease to proven growth and performance values along with superb end-product merit. The bulls have been developed in a true testing environment and fed to maximize their genetic potential while maintaining structural soundness. With over 70 bulls selling there will certainly be a bull who possesses the phenotype and EPD profile to meet your needs.

In the female offering you will find nearly 75 females selling, ranging from spring pairs to heavy bred females and a super neat set of spring yearling replacements. As you study the female pedigrees you will find they are sired by the "Who's Who" of the Angus breed. Regardless of your programs genetic direction you will be able to invest with confidence that you are adding quality

performance traits while also adding females that have the phenotype everyone can be proud to have in their pasture.

All of us in the cattle business are faced with as much positivity in the future of this business as we have ever seen! The dynamics are right, as you study the cow-herd inventory, to have several uplifting years in the demand and value of good, high-quality genetics. In fact, there is little doubt that the bulls selling will sire some of the highest priced calves many of us have ever seen in the marketplace. The spring of 2023 will be the time to invest in Bull Power and Cow Power to position yourself for these exciting times ahead.

Feel free to give me a call at (918) 510-3464 if you would like to discuss this offering. You will be able to bid online at DVAuction.com where video footage will be available for viewing prior to the sale. We look forward to seeing you the afternoon of February 24, 2023 in Bloomfield, IA.

Rance Long

Herd Health

Interstate health papers furnished on all cattle selling.

Bulls have been vaccinated with Inforce 3, Pyramid 5 Presponce, Alpha 7, Fusogard, Wart vaccine, autogenous pinkeye vaccine and have been wormed with Safeguard and poured with Cylence Pour-on Insecticide. All calves have been vaccinated with Calf Guard at birth and Nasalgen 3 PMH between 7 and 30 days of age. All breeding age females are on a modified live vaccination program using Bovi-Shield Gold FP5 L5 HB and Vision 7 Somnus with Spur, Endovac Beef and wormed with Safeguard and poured with Cleanup II. Pregnant cows have been given Scour Bos 9 and Vitamin E+AD. All Cattle over 7 months of age have been tested BVD-PI negative.

Bull Guarantee

Our bulls have been managed carefully to ensure your success. All bulls will have passed a breeding and semen evaluation by a licensed veterinarian before being sold and/or delivered. The cattle are guaranteed to be fertile and reproductively sound in accordance with the recommendations of the American Angus Association. Bulls selling for \$2500 or more are guaranteed against injury or infertility issues for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. If a replacement bull is available, he will be provided, or if the buyer prefers, credit toward one bull will be given in the following year's sale season, less salvage value of the injured bull and prorated time of use. All injuries will require a vet inspection and please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. ALL CLAIMS MUST BE MADE BY OCTOBER 1, 2023. Replacement bulls are not covered by this guarantee. This is not intended to be a mortality insurance policy. It is recommended to purchase livestock insurance to mitigate this type of loss.

Post-Sale Bull Boarding and Delivery

We will board bulls free of charge until turnout on bulls selling for \$2500 or more at the new owner's risk. Arrangements can be made to assist with board, delivery and transporting of bulls after sale. Please contact Dennis or sale management immediately after the sale to confirm your intentions. Free delivery prior to turn out within a 150 - mile radius of Waverly or Bloomfield, IA on bulls boarded at Deppe Angus. Trucking arrangements can also be made for delivery outside of this radius. Arrangements can also be made to deliver on our trip to the Midland Bull Test, MT in early April.

Fertility

All bulls 12 months or older have passed a breeding soundness exam performed by a licensed veterinarian. Such exam will be noted on the official Certificate of Veterinary Inspection or presented on a "Certificate of Fertility Evaluation." All bulls less than 12 months of age are guaranteed by the seller to be fertile breeders. A breeding soundness exam prior to delivery will be conducted if housed with us after the sale.

Off Test Data

Off test weights, ADG, Scrotal Measurements, adjusted IMF, REA and Back fat will be available at deppeangus.com, dvauction.com and the on-line sale catalog approximately one week prior to sale day and part of the sale day supplement sheet.

Catalog designed by

Progress Through Testing

Understanding EPDs

Expected Progeny Difference (EPD) is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus.

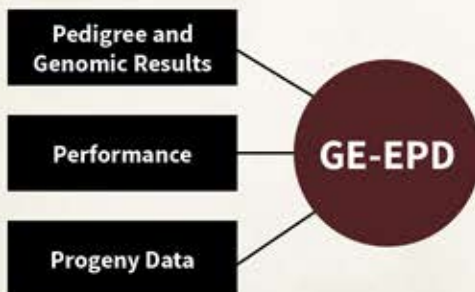

Genomic-enhanced EPDs are the best estimate of an animal's genetic value as a parent combining all available sources of information. Genomics permit higher prediction accuracies for younger animals and characterizes genetics for traits where it's difficult to measure the phenotype. To learn more about available genomic tests, go to <http://www.angus.org/AGI/default.aspx>

"EPDs are an excellent tool for producers to utilize and sort genetic variation among the breed's gene pool and match relative economic traits to their operation's goals, environment and resources."

- Dennis Deppe

Trait	Percentile Rank	Observation
Calving Ease Direct	1%	More unassisted
Calving Ease Maternal	1%	More unassisted

Stout made, powerfully built Iconic son is a herd bull in the making. His dam is a beautiful uddered cow in the prime of her life and sells as lot 106. Maternal brothers have sold to Bales Ranch, MT and Ledgerwood Farms, MO. Excellent choice for combined growth and maternal genetics. Recommend for use on heifers.

EPD Definitions

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (Doc), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Claw Set EPD (Claw), is expressed in units of claw-set score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal claw set. The ideal claw set is toes that are symmetrical, even and appropriately spaced.

Foot Angle EPD (Angle), is expressed in units of foot-angle score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal foot angle. The ideal is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

Pulmonary arterial pressure EPD (PAP), is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet. Selection for this trait aims to improve the genetic potential for a sire's progeny to have lower PAP scores thus a lower chance of contracting high altitude disease increasing the environmental adaptability of cattle living in mountain areas.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

Beef Value (\$B), a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

Stud prospect that combines some of the most sought after genetics of the breed today. His first calf heifer dam by Growth Fund is stacked with maternal power. One of the high growth, marbling and \$C bulls of the offering. Look to add premiums to those fed cattle when they hit the grid at around a year of age.

The ONLY Iconic son in the Angus population to combine his EPD values of CED, YW, SC, DOC, Marb and \$C. He checks all the boxes for being a calving ease, carcass bull with great growth and maternal figures. He to is an attractive patterned, great structured bull from one of our favorite cows whom produced a standout bull in our Midland Bull Test pen last year. He is worth the ROAD TRIP to Bloomfield. Recommended for use on heifers.

The ONLY bull in the Angus population to combine his CED (17), Marb (1.22) and \$M (110) values with an added bonus of top 1% HP and 10% PAP.

Duracell 279 offers superior quality, dependability, and generations of genetics both phenotypically and with genomically enhanced EPD's. This stud bull prospect's granddam is a maternal sister to Werner War Party. His dam was our high selling female in our 2021 production sale and produced two top selling Growth Fund sons at the 2022 Midland Bull Test selling to Molitor Angus, KS and Carl Dethlefs & Sons, NE. Proven rock solid cowman's pedigree. Think about the potential ways he can work for you. Recommend for use on heifers.

Calving ease bull sired by Summation is super thick and chunky. Summation moderates the frame but doesn't lack in muscle or weight gain. We have really been impressed with the power and growth that our Dually daughters have injected into their offspring. Outcross pedigree with an excellent birth weight to yearling growth spread. Dam sells at lot 136. Recommended for use on heifers.

This big boned, stout made Revelation son will be sure to catch your attention. His first calf heifer dam, sire by Growth Fund, is doing what we had hoped for. He will excel in siring fast growing, long bodied, thick topped cattle that push down the scale and hang pounds of red meat. He should be a sure find on sale day.

This Barricade son is super wide and big bellied. If you like deep and thick, this is the bull for your program. This young herd sire prospect is a great addition to add pounds of end product.

Our Iowa farm families have a relentless passion for raising high-quality Angus cattle. Together, we raise Deppe Angus cattle, which carry a "Circle D" brand. Every cut of beef that you purchase from Circle D Meats starts with Deppe Angus genetics. Because of the genetic consistency and how the cattle are raised and fed, you can expect the same great quality and flavor time after time.

Hold the phone! This calving ease son of the sensational Barbara 470 donor is simply impressive both on paper as well as phenotypically. Excellent marbling with a pedigree that reads with power and mass. His maternal brother, Full Spectrum, was the exciting and heavily talked about high seller in last years sale purchased by Ross Land and Cattle and Leaders Angus. Pay close attention to his CED, Marb, \$M, \$B and \$C! He can make PGS females with those EPD tabulations and pedigree. Also selling choice of his two flush sisters, lots 172 and 173. Recommended for use on heifers.

I have been excited for a long time to see how this young Jet Black dam, out of a full sister to Endeavor, was going to produce. Needless to say, I am super excited for her future seeing this first son by Growth Fund. 2335 is great calving ease, spread bull with a big top and hip. His exceptional EPD values speak to the potential of this young herd bull. Recommended for use on heifers.

Capitalist 028 back on the Pride cow family has sure worked over the years. The females are super uddered, sound on their feet and legs and very productive females. This calving ease bull offers a balance of low birth weight, muscle shape and density with maternal power. Flush brother to lot 65. Recommended for use on heifers.

Bull Feeding Philosophy

“Foundation Feeders has been successfully developing bulls for purebred breeders for over 20 years now. Our philosophy has always been to develop the rumen with as much spring of rib as possible. We accomplish this by feeding a high roughage diet that consists of high levels of protein for muscle growth and high levels of mineral profile to promote health and fertility. We achieve rumen stretch when we tease them with energy. An animal will eat until they are physically full or have met their energy requirement. We want them to be physically full every day.

With a properly developed bull they will not crash out on pasture breeding cows and will have good feet and legs.

79	57	24	81	11	98	82	37	3	95	92	43	97	64	99	9	43	37

Flush brother to lot 64 with a little more power and stature. The Pride cow family is known for their longevity and excellent balance and profile.

They will thrive because they have the rumen capacity to eat enough forage to keep growing. If they were feed too much grain and tight gutted, they would lose weight on pasture and mobilize too much fat through the liver. Grain fed bulls show big gains but also have feet problems along with losing weight on pasture.”

- Ron Holty, Foundation Feeders, Inc

This powerhouse, big ribeye Atlantis son is super complete. Atlantis and True North are flush brothers that gathered much attention a few years back. His donor dam, Barbara 470, has created quite a stir and is considered one of the top First Class daughters for phenotype and performance excellence. His kind simply creates flat good cattle that have extra power and grow while maintaining that attractive look. Making it enjoyable to chore that set of feeders or check the females in the summer pasture.

Pasture exposed to Deppe Stellar 118 from 3-20-22 to 6-15-2022.

Bismarck daughters have been the mainstay of ranchers for years. We all know their value in raising top end cattle and leaving generational legacies in the cow herd. Buy with confidence in this easy on the eyes, productive Bismarck daughter. We have retained daughters and she still has years of productive life ahead of her. There is good reason these aged cows are still around. They work hard and generate dollars.

Deppe SFF Full Spectrum bull calf born 12-21-2022

We purchased the Princess 4901 cow from Express Ranches with Willow Branch Stock Farm where she had a very successful show career for Baxter. Even better, she has been a great producing cow and has sold many bulls. We have retained all of her daughters and they too are generating like she has. Yes, that is our first calf by our sale topping Full Spectrum bull and we could not be more pleased. What a combination of genetic powerhouses. Get on the ground floor of this great pair. Baldrige SR Goalkeeper bull calf born 12/25/22

This Sherman tank of a cow is one of the early descendants from Blackcap 6224. She has generated multiple top selling bulls and replacement daughters. Her full brother created a beautiful set of commercial replacements and top selling feeders for the Smith family over the years. The bull calf on this pair might just be your next herd bull.

AI bred to Baldridge Versatile on 3-19-22. Pasture exposed to Deppe Stellar 118 from 3-20-22 to 6-15-2022.

Stella was one of my favorite cows in the 2XL dispersal and full sister to a bull in a Midland World Champion Pen of Three. She produced our Stella 0289 donor that has many sons featured in this sale. This one can generate.

"We calved 99% this year! Only one old cow didn't breed back. Best year we have had in 4 years! All live and healthy! I would say you have good bulls!"

- Text from Andy Besco, Iowa
First time bull buyer, Spring 2021

Ellingson Deep River bull calf born 12-24-22

This really big bodied, thick ended Barbara K cow is sure to impress. Her dam by Net Worth has been a pasture favorite of many over the years. You will see the impact of the 555 cow in our pedigrees for years to come. Buy with confidence and take a look at the young herd sire potential at her side.

Db Iconic G95 heifer calf born 1-1-23

This donor cow is sure to please the most discriminating. She is the dam of the Lot 1 bull in this years sale, making the heifer calf at side even extra special. She will sure be hard to see her leave the farm, but we have several excellent daughters retained and we love to see our customers success as they take these super productive cows and work them into their programs. The future is bright on this special lot.

4M Ace 709 bull calf born on 12-25-22

Another fantastic Pride daughter in the prime of her life. We can offer the caliber of cows like her, because we have 3 daughters retained and working hard. The Black Granite daughters may be some of the most productive females we have had the opportunity to work with. Seeing Black Granite at stud makes you understand why he is timeless fixture of the breed. This is a very exciting bull calf by the popular 4M Ace bull who makes them really correct and thick. Herd bull potential.

Musgrave Redemption bull calf born on 1-22-23.

Barbara K 704 may be the most gentle cow to be around. Her progeny are pen favorites and her 2022 Growth Fund daughter is a standout. Musgrave Redemption is a past Musgrave sale topper and we adored the first set of calves he sired last year and we felt he was a must use. This young Redemption bull calf has a ton of upside generating power.

AI bred to S A V Emblem on 4-16-22. Pasture exposed to Deppe JA Growth Fund 1226 from 4-17-22 to 6-15-22.

A wonderful Angus Valley daughter of the Pride cow whose flush sisters were sale highlight last year going to Mark Easter, NE and Till Farms, IA. I know they will be holding on closely to the offspring from their purchases. Both females have already made their way to the donor pen. We retained her Emblem daughter last year and have several of her full sister's daughters retained as well. The Pride 275 is one of the most influential producing cows at the Midland Bull Test over the past decade. Time tested genetics.

Sitz Incentive 704H heifer calf born 12-17-2022
The calf on the side of this great producing Pride daughter might just be the one. The Sitz Incentive semen was hard to get and we were fortunate to be able to breed several cows to him. Man the calves are everything we hoped for. Good structured, big topped and soft ribbed thus far. It sometimes can be hard to part with cattle of this caliber, but we know the value of repeat buyers. This pair will make you want more like her.

Performance bred Angus with balance, structural integrity, and eye appeal

Sitz Incentive 704H heifer calf born 1-4-23

DONOR ALERT! "Pinch me Andy, are you actually letting me put her in the sale?" was the conversation when we were putting together our list of sale females. She stems from the same great Mistress cow family as our Division 4 winning PGS female at the 2022 National Jr Angus Show. They all have that beautiful front third, massive center and extra wide top, hip and quarter all in a structurally correct, balanced package. A daughter was a sale feature acquired by Denver Devore, IA. A powerful Growth Fund son sells as lot 9. The Incentive heifer calf to boot makes this pair extra, extra special.

AI bred to Deer Valley Growth Fund on 5-9-22. Pasture exposed to Deppe Stellar 118 from 5-10-22 to 6-15-22.

Dang, this Lady Jaye Epic daughter sure gets your attention when you see her. Hard to keep track of the number of people whom ask, "what is that one?". We sold a maternal sister that knocked it out of park for Haerr Farms, MO and four maternal brothers at the Midland Bull Test, MT. Her Granddam is a maternal sister to Werner War Party.

AI bred to KR Cadillac Ranch on 5-9-22. Pasture exposed to Deppe Stellar 118 from 5-10-22 to 6-15-22.

Very exciting chance to pick up a great breeding piece from the Bardot cow family that have been income generators for Foster's, Dameron's and Express Ranches over the past years. Her dam is a flush sister to a past Express Honor Roll Sale high seller and highlight show prospect for the Allison family, OK. Her sire, Bank Note, is a Canadian bred bull the I saw on my travels through Montana. We are sure thankful we used him. Great udder quality and superior looks and performance. A full sister sells in the open heifer division as lot 158. Check out the potential of this mating to Cadillac Ranch, a Krebs Ranch herd sire.

Baldridge SR Goalkeeper bull calf born 12-25-22.

Opportunities like this don't surface everyday. I knew at some point we would start sharing some of the Panther Cr Incredible daughters that we have produced, and this is sure a great place to start. We have been really fortunate to have put many of these daughters into our program through his heavy use in our ET program. Check out the balance, structure, performance and EPD profile of this one out of the Blackcap 792 donor that highlighted our 2021 production sale to Belgian Acres, IA. She has a Resilient son that sells as lot 5. Outstanding Goalkeeper bull calf at side that is sure to find a his mark in the breeding pasture next year.

AI bred to Ellingson Authorize 7057 on 5-1-22. Pasture exposed to Deppe Stellar 118 from 5-10-22 to 6-15-22.

Another Cowboy Up daughter from the Pride clan. Offers a low birth weight to high growth spread of EPDs. Better yet you will appreciate her for her balance and eye appeal. The Pride cows are prolific and make excellent mommas. Her iconic daughter is offered as lot 160. There is good reason why we have propagated them heavily in our program.

4M Ace 709 heifer calf born 12-13-22.

Very unique pedigree and opportunity in this young Panther Cr Incredible daughter. The true value in Incredible will be the fantastic females he has created. The dam of this young female has produced the American Way bull that went on to create quite a buzz when he was named Champion Bull at the NILE in Billings, MT for Zuck Cattle, IA and Bates Family, MT. A full brother highlighted our 2021 Midland Bull Test pen and sold to Sieben Ranch, MT. A Southern Charm daughter sells as lot 153. Excellent Ace daughter nurses her and will be a top end replacement and breeding piece.

Sterling Pacific 904 bull calf born 1-4-23.

First calf Enhance daughter that calve easy and is making a wonderful young cow. She is a very highly productive female that is milking hard and raising a big calf on her first try. Sterling Pacific is a new highlight sire that is siring top selling sons throughout the country. He makes really sound structured, dense made, cattle with eye appeal. This bull calf has upside potential.

With the value of Upward 307R daughters are getting older within the cow herds where he was used, however the value had not waned at all. It has actually increased due to their productivity. We decide to flush the very productive Blackcap 244 cow this way to make more replacement females. We offer a sample of the potential this brings to the table for the next decade. Upward daughters are timeless because of their ability to produces high quality pounds in and easy maintained and strong maternal fashion. I have lots of confidence in this young female.

Car Don Annuity 114 bull calf born 12-13-22.

Direct daughter of our high income producing Bardot cow that need little introduction. She offers mating flexibility in a variety of scenarios. Mate to Angus for performance or show projects or even create some really attractive half blood Simmentals. It is hard to find opportunities to add Bardot genetics. We have several in the offering. This Annuity bull calf is looking the part.

Customer satisfaction and success are our top priority

Enhance daughter form a wonderful Blackcap daughter that we sold in our 2022 production sale to Bauman Cattle, TX. Her dam and maternal sister thrived through the drought and months of triple digit heat. We are grateful for our customers success and that our cattle can work in so many different environments. We sure understand the cattle need to covert grass wherever the pasture may be.

2020

Available immediately for IVF

Deppe FC Barbara 470 cow created quite a stir last year when she was on display and her top selling son, Full Spectrum, was one of the most talked about young sires to sell in Iowa last year. Last year alone, she has generated over 6 digits in progeny and embryo sales. She is an absolute beast from every angle you look at her. From the smooth blend of her neck into her shoulder and then to her massive sweeping rib. Moreover, this Beth Dutton of Angus cows stands on an impeccable foot and pastern set that carries her weight in an athletic free moving motion. The power from her top, hip and lower quarter is second to none. Couple that with the fact that her calving ease, weaning and yearling growth EPD's and fantastic carcass valuation can't be matched by any other First Class daughter. She is the ultimate Phenotype and Genotype (PGS) donor cow that traces to the famous W C C Barbara M84 donor at Anderson's Double Diamond Angus in Chrisman, IL. Check out her progeny selling and take advantage of this IVF cycle. She has been averaging 12 embryo viable frozen IVF embryos per cycle this winter without the use of FSH. **Offering one IVF Cycle on this female with a guarantee of at least 8 embryos with the result 4 pregnancies when embryos are implanted by a certified technician. Cost of flush and semen are buyer's responsibility. Flush to be conducted at TransOva Genetics or Collison Embryo. Can be completed as early as the week after the sale.**

Maternal Brother to Dam of Lot 151

Available immediately for IVF

Deppe Mistress 0419 was the crowd favorite and Division 4 winning female at the 2022 National Jr. Angus Show and the Reserve Division Senior Heifer at the Iowa State Fair for Kyle Deppe. The overall mass and power in this Dually daughter is exceptional considering how long and elegant is still through her front third and complete in her balance and profile. She is the kind of production female we strive for with her phenotype, production record and great set of genomically enhanced EPDs. The Mistress cow family has been something we have been breeding on and developing within our program for years and we have rarely released these genetics to the public. When we have, they are test station winners and sale toppers. Her granddam is a 12 year cow that still is going strong in her production with 27 recorded progeny (AI or ET), with her last three calves having an average weaning ratio of 123. This is a rare and great opportunity to flush this truly unique, outcross female to the bull of your choice and create your own outstanding herd bulls or PGS show females.

Offering one IVF Cycle on this female with a guarantee of at least 8 embryos with the result 4 pregnancies when embryos are implanted by a certified technician. Cost of flush and semen are buyer's responsibility. Flush to be conducted at TransOva Genetics or Collison Embryo. Can be completed as early as the week after the sale.

Excellent Summation female with plenty of power to go around. This broody female is extremely deep middled, bold down her top, and still maintains an attractive look while setting down a good set of feet and legs. Not to mention, she also offers a well balanced and intriguing set of genomically enhanced EPDs. She is a maternal sister to Deppe Mistress 0419, the featured IVF Donor lot 151. She has the potential to compete at a high level in the PGS female division this summer. Retaining the right to 2 flushes with a minimum of 12 viable frozen embryos.

Definite sale feature and donor potential. Her dam was selected as a top selling bred female in the historic Werner dispersal and then sold as a top selling feature in our 2021 production sale after having been a prolific donor. Her dam also produced two top selling Growth Fund sons at the 2022 Midland Bull Test selling to Molitor Angus, KS and Carl Dethlefs & Sons, NE. Her phenomenal flush brother sells as lot 7. Study her base width, capacity and structural integrity. Then couple that with being sired by Resilient and having a top of the breed EPD profile. We feel the genetic material is here for making cattle that breed true for generations to come. We want to offer our very best. Selling 1/2 interest with possession negotiable.

Pay close attention here! This will be the last opportunity to acquire a young female from this knock out flush. All the embryos are gone. Yes, this is a flush sister to Blackcap 0212, Res. Division 2021 National Junior Angus PGS Show, and Blackcap 1250, our 2022 Progress Through Testing highlight female. Over the last two years, we have received many positive comments on how high quality they are and how they fit so well into the production world of cattle. Now they are proving that in the pasture, her sister, Blackcap 0212's first calf by Growth Fund was our heaviest adjusted weaning weight calf this past fall. We believe this may be the best of the flush sisters yet; combining the extended front 1/3, femininity and balance of 0212 with the added depth of body, power, and substance of 1250. In addition, study her EPD profile closely, a female of this quality with over a 1.00 on marbling and excellent in calving ease, growth and her maternal tabulations. Absolutely appreciate the consistency this mating presents in phenotype and genomics. We could go on and on about the potential of this great female, just study our program to see what the Blackcaps have done. When opportunities like this knock, open the door and welcome them in. The reward will be remarkable. Selling 1/2 interest with possession negotiable.

This fancy Bank Note female will be sure to catch your eye and make a wonderful cow when she is done with her show career. Her dam is a full sister to a past High selling female in the Express Ranches Honor Roll sale. The Bardots need no introduction to those around the Angus business as they have been highly valued females for the Seldom Rest, Dameron Angus and Express Ranches.

We have been eagerly waiting to see the Incredible daughters in production and 287 is the result of a small sampling of Annuity, the exciting Krebs Ranch herd sire back on the phenomenal Blackcap 0212 donor. Needless to say, we are very pleased with the results, especially having watched this one develop. Backed by the immortal 6224 and a daughter of 0212, our Res. Division PGS heifer at the 2021 National Junior Angus Show. This young prospect will compete and be a knock-out producer. This is a sure find on sale day.

Payweight 006S is best known as the sire of Basin Payweight 1682. We all know the impact he has made on the breed. We were fortunate to be able to acquire semen on him and flush several of our top donors. This young female is one that is timeless in her genetics and still has the EPD profile that is competitive with the newer generation cattle. There is great potential for her to make top end genomic cattle.

Mark Easter, NE bought the dam last year as an 11 year old cow with a Growth Fund heifer at side. He was so please with his purchase he instantly started to flush her to make more daughters like her. We love hearing of our customers success and we offer these two daughters as an opportunity for you to create your own success for the next decade. Lot 167 is a flush sister to two of our three bulls that were in our Midland Bull Test World Champion Pen of Three. Buy time-tested genetics with confidence.

"What is that one?" "Where did she come from?" "Wow, look at the power and balance in that one!" These are just a few comments we heard as visitors stopped in and looked at the females. Uniquely bred with the elegance and performance of the ever popular production sire, Annuity, with a First Class daughter form the Bardot cow family. This one rings a bell and has lots of ROI potential.

The Barbara 470 cow needs little introduction. Here is an opportunity to choose from what might be two of her best daughters yet. They are bold in their rib, correct in their design and look great from any angle. Exclusive daughters will be in high demand as they start hitting their stride in production. These flush sisters to lot 49 encompass a performance breeding program with the a balanced approach to combining maternal, carcass, and function in a real world setting with EPDs backed with the most advance research and genetic testing available. Come check them out for yourself. It will be worth the trip. We are offering choice of these two great foundation females that will go on and make tremendous show prospects and ultimately fantastic cows. Retaining the right to 2 flushes with a minimum of 12 viable frozen embryos on the chosen female.

This attractive patterned Southern Charm has wonderful shape and turn to her center rib and has a big square hip. She would be a really good young show prospect that will make an excellent cow. Her grandmother was the high selling pair in last years sale going to Cribbs Cattle, SD where she instantly entered their donor program. I have a lot of faith in this female.

Excellent way to round out the open females with this big \$C daughter of Annuity. These Annuity daughter should offer the same type of maternal and consistency as his sire Growth Fund with more balance and femininity.

“That Emblem is a joy to look at everyday. She is so docile. Got a feeling there’s some guys that would love to haul her around this winter..”
