HYLINE ANGUSE

WELCOME TO THE 44TH ANNUAL HYLINE ANGUS BULL SALE! DEAR CATTLEMEN,

Welcome to our 44th annual Bull Sale. Since the inception of Hyline Angus Ranch 64 years ago, we have always strived to identify cow families that thrive under our western range conditions. We have done this thru Montana Beef Performance Assoc. and now thru AHIR. Most of the cow families in our herd go back at least 10 generations of progeny ratios of over 100 ratios on their calves. It is our belief this is how you get predictability in the cattle, by culling off the bottom end and only keeping the top producers. Our cattle are Practical and Predicable.

2022 turned out to be a challenging year for us. My father in law got sick

in July, and Alice and Tillie were busy taking care of him. John passed away on Sept 11. He was a good man and will be missed by all. This was a very stressful time for the family. 30 days later Alice was informed by her heart doctor that she needed immediate open heart surgery to replace her aortic valve. Off to Missoula we went. It was decided there that she would need a mechanical valve. I made sure it was an American made valve! The surgery went well but 7 days after the surgery she developed a blood infection which landed her back in the hospital for another week. She is on the mend now and doing well. Between doctor visits and time spent at the hospital I have not been around the ranch much. Ben was on his own taking care of

BEN & KIRBY VAN DYKE

everything and we appreciate all his hard work. He did a great job and took a lot of stress off of me. Thanks so much to Ben, Kirby and son Leo for all they do. All in all I am really glad 2022 is over!

The bulls selling are Stout and Sound. They will increase weaning weight and will leave you with females that will have added value. This year after the bulls were weaned, they were turned back out on grass til the end of Oct. They were started on feed the 1st of Nov. We feel by limiting the amount of time in the feedlot will help endure soundness down the road. The bulls are performance tested, PAP tested and fertility tested and ready to go to work for you. PAP results will be available the first part of Feb. Normally the results are in the catalog, but we wanted to wait as long as possible to test them for more accurate results.

This is an awfully good set of bulls and we know they will work really well for you. We really appreciate your continued support of our program.

Please join us on Feb. 24, 2023 at Headwaters Livestock in Three Forks for a delicious TriTip lunch at noon with the sale starting at 1 pm. Hope to see you sale day for good conversation and a great set of bulls.

There will be a \$200 discount for any bulls taken home that day.

THANKS FROM ALL THE FOLKS AT HYLINE!

HANGUS AATH ANNUAL BULL SALE FEBRUARY 24TH, 2023 • 1 PM

AUCTIONEER Kyle Shobe 406-366-0472

ASSOCIATION REPRESENTATIVES

ONLINE BIDDING

Sale will be broadcast live online at DVAuction. www.dvauction.com

Register to bid prior to the sale

44TH ANNUAL BULL SALE • FEBRUARY 24TH 2023

HYLINE

AN OLD FARMERS ADVICE

- 1. Your fences need to be horse-high, pig-tight and bull-strong.
- 2. Keep skunks and bankers at a distance.
- 3. Life is simpler when you plow around the stump.
- 4. A bumble bee is considerably faster than a John Deere tractor.
- 5. Words that soak into your ears are whispered...not yelled.
- 6. Meanness don't jes' happen overnight.
- 7. Forgive your enemies. It messes up their heads.
- 8. Do not corner something that you know is meaner than you.
- 9. It don't take a very big person to carry a grudge.
- 10. You cannot unsay a cruel word.
- 11. Every path has a few puddles.
- 12. When you wallow with pigs, expect to get dirty.
- 13. The best sermons are lived, not preached.
- 14. Most of the stuff people worry about ain't never gonna happen anyway.
- 15. Don't judge folks by their relatives.
- 16. Remember that silence is sometimes the best answer.

17. Live a good, honorable life. Then when you get older and think back, you'll enjoy it a second time.

18. Don't interfere with somethin' that ain't botherin' you none.19. Timing has a lot to do with the outcome of a rain dance.20. If you find yourself in a hole, the first thing to do is stop diggin'.

- 21. Sometimes you get, and sometimes you get got.
- 22. The biggest troublemaker you'll probably ever have to deal with, watches you from the mirror every mornin'.
- 23. Always drink upstream from the herd.
- 24. Good judgment comes from experience, and a lotta that comes from bad judgment.
- 25. Lettin' the cat outta the bag is a whole lot easier than puttin' it back in.

26. If you get to thinkin' you're a person of some influence, try orderin' somebody else's dog around.

27. Live simply. Love generously. Care deeply. Speak kindly.

HIGH MOUNTAIN DISEASE

High Mountain Disease, or commonly known as Brisket Disease, is a very common condition seen in cattle raised in regions greater than 5,000 ft of elevation. The disease is characterized by ventral edema in the brisket region that is caused by high blood pressure in the lungs and right sided heart failure.

Cattle mortality from this disease can result in the loss of 3% to 5% of the calf crop but has been reported to be as high as 25% and morbidity greater than 40%. Historically, Brisket Disease has been a problem of higher altitude environments but recent evidence has shown that cattle at much lower elevations are being affected, particularly in the high plains feedlots. All breeds can be affected and often times animals will be "sub-clinical", meaning that they do not show outward signs of being ill but will not grow or produce like they should.

Through PAP (Pulmonary Arterial Pressure) Testing, we can determine an individual animal's potential to develop Brisket Disease and because High Mountain Disease is moderately heritable in the angus breed, we can evaluate that animal's potential to pass on genetic traits that can greatly influence the performance of that animal's offspring. The PAP test can be influenced by several factors other than genetics but because it is an actual measurement, it is far more accurate and reliable than the current EPD that is being used making yearling PAP the most common phenotype used to determine if cattle are tolerant to high altitude production systems.

A crucial component to the PAP test being more reliable and accurate than the EPD is that cattle are tested at the appropriate age and elevation. It is important that cattle being tested are at least 12 months of age when the test is performed and that those animals have resided over 5500 feet of elevation for at least 30 days. The higher in elevation that the animals reside, the greater the confidence we have in our PAP testing data.
